Despite her youth, Alice Wonder is a fundamental artist in order to understand the current musical scene. With an undeniable furry voice, and compositions whose profound lyrics and subject matter connect with different generations, Alice Wonder will be in charge of closing the 2023 edition of the Malaga Film Festival at a live acoustic concert with keyboard and guitar, during which the singer will go over all the songs that have turned her into one of the artists of the moment. Just with her EP debut *Take off* she accumulated several million reproductions of the single with the same name. That was followed by *Firekid*, her debut record, whose 11 songs in English reflected more than ever the sparkle of the artist's musical precocity. On 14 May, 2021, Alice Wonder published *Que Se Joda Todo Lo Demás*, her first album entirely in Spanish, which has already accumulated millions of reproductions in online platforms.
