Big changes begin with small gestures.

Sara and Tomás are siblings who invite us to share their memories of when they were young and lived with their parents in a village house surrounded by their garden and the sea. One day, they realised that the climate, the animals and the plants around them were changing. A large city had even invaded all the space, causing their natural landscape to disappear.

Perhaps the solution to all these problems begins with a simple CLIC!

Founded in 1998, JM Gestión Teatral is one of the most stable children and family theatre companies of the Valencian Community. Its components have participated in different theatrical productions and actions with Carles Castillo, Moncho Borrajo and Els Comendians, in films and on television, in events such as the inauguration of the amusement parks Terra Mítica and Isla Mágica, and for the Valencian Museum of the Enlightenment and Modernity (MuVim).
